VERVANTÉ SPECS FOR KISS CUT STICKER SHEET

WHEN CREATING YOUR STICKER SHEET, PLEASE USE THESE GUIDELINES:

- ½" margin between cut lines on top and bottom or short sides of sticker sheet
- ¼" margin between cut lines on left and right or long sides of sticker sheet
- ⅛" bleed from outside cut line
- ⅛" margin from edge of sticker sheet to die cut lines
- 1/16" margin between stickers
- To properly set up a cut path, use a vector shape with a .5 pt stroke in 100% magenta
- The cut path can have no sharp corners
Our standard corner radius is 1/8"
- The minimum corner radius is .04"
- 300 dpi PDF
- It's best if the die has no hard corners, slightly radius the edges. Two opposite sides of the sticker sheet need approximately 0.375" safety zone.
The other two opposite sides 0.5" safety zone.
- Each sticker needs .125" bleed and inset margins and each sticker has to be .0625" away from each other
- Maximum of 30 sticker peel-offs per sheet
- Round corners on all cut lines, .04 radius
