

# GET STARTED

# Replicated Discs

## FIRST STEPS

1. If you don't already have a Vervante Author Account, please establish one [here](#). It's quick and easy.
2. We can provide you with a [quote](#) and packaging options for your CD and/or DVD product. Simply email us at [customerservice@vervante.com](mailto:customerservice@vervante.com) with details about your project, including: how many CDs (or hours of recording) you have (or expect to have) or how many DVDs. Click [here](#) to get a quote.

## EXPERT TIPS

**Minimum Order:** Replication of your CDs and/or DVDs is available beginning with a run length of 250 or more. If you anticipate selling them over a period of time, we can replicate your discs, hold them in our inventory and then ship them as we receive orders.

**Types of CDs:** There are three types of CDs. We recommend audio CDs or MP3 CDs for Audio Books.

- **Audio CDs:** these are 79 minutes in length and can be played in a car or on a computer.
- **MP3 CDs:** these are CDs that can only be played on a computer using an MP3 player such as iTunes or Windows Media Player. These CDs hold 700 MB of audio.
- **Data CDs:** these CDs can contain a combination of files such as audio, MS Office, PDFs, etc. These CDs can hold 700 MB of data.

**File Format:** We accept audio recordings as wav or MP3 files. If you would like your audio professionally edited or have intro or exist music added, our Multimedia Production Services team would be happy to help. Just email us at [customerservice@vervante.com](mailto:customerservice@vervante.com) for more information and a quote for services.

**Multimedia Editing Services:** If you have raw video and would like our Multimedia Production Services team to author your DVDs we would be happy to assist you with this. Email us at [customerservice@vervante.com](mailto:customerservice@vervante.com) for a quote or more information.

**Registering Your Tracks:** Do you ever wonder why some audio tracks are displayed in iTunes or Windows Media Player as Track 1, Track 2, etc. or the title is inaccurate but the content is correct? This is because the tracks have not been registered in GraceNote. We highly recommend that once we create your Audio Book that you submit your tracks to GraceNote so track titles are properly displayed. Please see our Expert Guide on [How to Submit Your Tracks to Gracenote](#).

## START PRODUCTION

To replicate your discs, we need a physical DVD master. For detailed information and instructions, access our FREE Expert Guides on [DVD Region Coding, Masters and General Information](#) and [NTSC and PAL formats](#).

# GET STARTED

# Replicated Discs

When sending us the DVD master, please include your name, project title and the number of discs requested, and mail to us at:

Vervante  
400 North Geneva Road STE C  
Lindon, Utah 84042

**Print Files:** We need one a PDF of the of the disc art. If your product is a multi-disc set, we need a PDF for each of the discs. The disc art should be created as a square image with no hub or exterior edge cut out. There should also be no mask or lines for the hub or exterior edge of the disc.

The disc should be a 5" square. The print area is a 4.67" circle. The hub is .75".

Your PDF should look like this and when we print the label art on the disc, it will look like this:

*This sample represents how your final print-ready PDF should look. The document size is 5" x 5". There should be no hub or disc keylines indicated.*

*Final product.*
